USB instructions for LED Name Badge

Mini LED

Display

- Put the CD into the Computer CDROM drive. Or get the program from our website at www.kompusport.com/products/software/led_displays.html or scan the QR code for our website page.
- 2. If downloading from our website, copy files from the zip file to your hard drive.
- 3. From CD or file location, run the Install.exe file.
- 4. The "Install Program" option will install the Mini LED Display program which will allow you to display up to 8 messages on the name badge. This allows for a quick and easy setup.

The "Professional Program" option will install the BMPBadge program which will give you pixel level design for up to 8 messages on the name badge. This is a more advanced setup.

5. These 2 icons will be setup on your desktop:

For Mini LED Display: (easy method)

- 6. Set the Setting -> Option -> Pixel to "11".
- 7. Connect the Name Badge to a USB port on the computer.
- 8. Select the proper port in the drop-down box in lower left corner of the program.
- 9. Select messages to be sent to the name badge by checking boxes under the Select column.
- 10. Press the Send button and message(s) will be sent to the name badge.

For Professional Program: (pixel level control & font selection of messages)

- 6. Set the Config -> Option -> Card Type Setup to "Mono 11 pixels".
- 7. Connect the Name Badge to a USB port on the computer.
- 8. Select the proper port in the drop-down box in lower left corner of the program.
- 9. Select messages to be sent to the name badge by checking boxes under the Select column.
- 10. Press Send button and message(s) will be sent to the name badge.

Editing Messages:

Input 1-8 different messages as you wish. Select display Speed - Level 1 Slowest to Level 8 Fastest. Select display Effect, Flash and Border to suit your need. You can also add images, invert the text, and change the font (BMPBadge only).
